Hiring Manager
Texas Instruments

Subject: Application for Fresher Role

Dear Hiring Manager,

I am writing to express my interest in the opportunity available at your organization. I recently completed my studies in Artificial Intelligence and Machine Learning Course from Yenepoya Institute Of Technology and I am eager to begin my professional career in a challenging and growth-oriented environment.

During my academic journey, I developed a strong interest in machine learning, artificial intelligence, and data analysis. As part of my final year project, I worked on “Parkinson’s Disease Detection Using Eye Movement and Voice Analysis,” where we applied machine learning techniques to analyze medical data for early disease prediction. This project helped me strengthen my technical, analytical, and problem-solving skills while also improving my teamwork and communication abilities.

I am familiar with Python, machine learning concepts, data preprocessing, and libraries such as NumPy, Pandas, and Scikit-learn. I am a quick learner, adaptable, and highly motivated to continuously improve my skills and contribute positively to the organization.

I believe that your company would provide an excellent platform for me to learn, grow professionally, and apply my knowledge in real-world projects. I would be grateful for the opportunity to discuss my qualifications further.

Thank you for considering my application. I look forward to hearing from you.

Sincerely,
Sarthak
