PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience developing intelligent applications using Python, Machine Learning, Generative AI, Large Language Models (LLMs), and Retrieval-Augmented Generation (RAG). Built full-stack AI solutions including Enterprise Multi-Agent AI systems, Natural Language-to-SQL platforms, AI interview systems, cloud optimization tools, and healthcare AI applications using FastAPI, Flask, React.js, and REST APIs. Experienced in designing scalable AI workflows, backend development, and applying machine learning techniques through academic projects and an AI/ML internship.

SKILLS

Programming Languages: Python, JavaScript, SQL

AI / ML: Machine Learning, Deep Learning, Natural Language Processing (NLP), Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, Scikit-learn, LangChain

Web & Backend: FastAPI, Flask, Node.js, Express.js, React.js, REST APIs

Databases: PostgreSQL, SQLite, Qdrant (Vector Database)

Tools & Platforms: Git, GitHub, Linux, Docker, Kubernetes, Hugging Face

PROJECTS

Enterprise Multi-Agent AI Platform

Tech Stack: Python, FastAPI, React.js, PostgreSQL, Qdrant, Docker, Sentence Transformers, RAG

- Developed a full-stack Enterprise Multi-Agent AI Platform enabling users to create multiple knowledge bases, upload PDF, DOCX, and TXT documents, and interact with uploaded documents using natural language conversations.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using Sentence Transformers and Qdrant for semantic search, context retrieval, and document-grounded responses with persistent conversation history.

AI-Powered Natural Language to SQL Business Insights Dashboard

Tech Stack: Python, React.js, Flask, PostgreSQL, SQLite, Groq Llama 3.3, Pandas, Recharts

- Built a full-stack AI-powered Business Intelligence platform that converts natural language queries into executable SQL statements for real-time analytics and KPI visualization.
- Integrated a multi-layered NL-to-SQL pipeline using Groq Llama 3.3, semantic query normalization, intent detection, and automated SQL post-processing for secure real-time analytics.

Intelligent Cloud Resource Optimizer

Tech Stack: Python, FastAPI, React.js, Node.js, NumPy, Kubernetes, Recharts

- Designed a multi-tier cloud optimization platform that detects zombie resources and orphaned workloads using statistical anomaly detection and real-time Kubernetes telemetry analysis.
- Implemented AI-driven cost optimization and right-sizing engines using FastAPI and NumPy, translating infrastructure inefficiencies into actionable financial insights and projected cost savings.

Multi-Modal AI System for Parkinson's Disease Detection

Tech Stack: Python, FastAPI, React.js, Scikit-learn, OpenCV, Librosa, Tailwind CSS

- Engineered a multi-modal AI system for Parkinson's disease detection by analyzing voice recordings and hand-drawn spiral and wave patterns using Random Forest models, achieving over 94% prediction accuracy.
- Implemented feature extraction Pipeline using Librosa (MFCC) for speech analysis and OpenCV/Scikit-image (HOG) for image-based motor pattern analysis.

PROFESSIONAL EXPERIENCE

AI/ML Intern, Contriver | Bengaluru, Karnataka

02/2026 – 05/2026

- Completed structured training in Python, Machine Learning, Deep Learning, Neural Networks, and Artificial Intelligence, building a strong foundation in core AI/ML concepts and practical machine learning workflows.
- Applied machine learning concepts through guided hands-on exercises involving data preprocessing, feature engineering, model training, model evaluation, and prediction workflows using Python, Pandas, NumPy, and Scikit-learn.
- Gained practical exposure to machine learning workflows through a traffic analytics and intersection conflict prediction use case, strengthening understanding of real-world AI applications.

EDUCATION

Yenepoya Institute of Technology, Mangalore, Karnataka

2022-2026

Bachelor of Engineering in Artificial Intelligence and Machine Learning

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Machine Learning with Python – IBM / Cognitive Class
