Professional Summary

Data Analyst with hands-on experience in SQL, Python, Power BI, and Excel, translating large and complex datasets into actionable business insights. Skilled in data cleaning, exploratory data analysis, dashboard development, trend analysis, and stakeholder-ready reporting. Delivered measurable impact including a 25% improvement in model accuracy and a projected 15% reduction in customer churn through data-driven analysis and predictive modeling. Passionate about leveraging business analytics and data visualization to solve real-world problems and support data-driven decision-making.

Technical Skills

Programming: Python, SQL

Data Analysis: Data Cleaning, Data Wrangling, EDA, Statistical Analysis, Data Validation, Trend Analysis, Root Cause Analysis

Microsoft Excel: Pivot Tables, VLOOKUP, XLOOKUP, INDEX-MATCH, Conditional Formatting, Dashboards

Visualization & BI: Power BI, Tableau, Matplotlib, Business Analytics, Business Intelligence, KPI Reporting

Python Libraries: Pandas, NumPy, Scikit-learn

Databases & Cloud: MySQL, MongoDB, Google Cloud Platform (GCP)

AI & Productivity: ChatGPT, Microsoft Outlook, Word, PowerPoint, Teams

Development Tools: Git, GitHub, Jupyter Notebook, VS Code, Streamlit, Flask

Professional Experience

Data Analytics Virtual Internship (Job Simulation)

Jul 2025 – Jul 2025

Tata Group

- Applied Generative AI tools for data exploration, quality assessment, and predictive modeling on structured business datasets.
- Improved model accuracy by 25% and reduced prediction time by 30% by optimizing data pipelines and preprocessing workflows.

Machine Learning Intern

Sep 2025 – Dec 2025

InternsForge

- Developed and validated machine learning models on real-world datasets, applying data cleaning and feature engineering techniques to improve model reliability.
- Collaborated with cross-functional professionals to review model performance, incorporate feedback, and refine analytical approach across multiple iterations.
- Supported end-to-end analytics workflows, from data preparation through performance evaluation and reporting.

Projects

Retail Sales & Profitability Analysis

SQL, Tableau, Excel

- Analyzed 50,000+ transaction records via SQL to identify sales trends and built an interactive Tableau dashboard tracking KPIs across 12 stores.
- Recommended data-driven pricing strategies projected to increase quarterly revenue by 10–15%.

Customer Retention & Churn Analysis

Python, Pandas, Scikit-learn

- Analyzed 7,000+ customer records to identify key churn drivers using exploratory data analysis and statistical methods.
- Built a logistic regression model achieving 85% accuracy; recommended retention strategies estimated to reduce annual churn by 15%.

Social Media Brand Sentiment Analytics

Python, NLP, Matplotlib

- Analyzed 10,000+ social media posts using NLP techniques to detect sentiment trends and flag emerging brand risks.
- Visualized a 20% spike in negative feedback via Matplotlib dashboards and generated word clouds enabling real-time strategy adjustments.

Education

B.E. in Information Science and Engineering

2022 – 2026

Yenepoya Institute of Technology

Visvesvaraya Technological University (VTU)

Relevant Coursework: Database Management Systems, Statistics, Data Mining, Machine Learning, Business Analytics

Certifications

- Generative AI — Google Cloud
- GenAI-Powered Data Analytics Job Simulation — Tata Group
